

To whom it may concern:

Hello! and thank you in advance for addressing the issues in this letter & for giving it your attention!

There are many things which disturb me regarding the Indian Springs Resort expansion. Among them to name only a few:

① Air pollution: dust rising from all the machinery needed to build + trash disposal... the dust is very fine + it is my thought that there will be more lung etc. problems due to this fine dust + more pneumonias etc.

And what about linen supply, food + drink trucks etc.

② Noise pollution: Car doors slamming in the early morning (for guests who are departing + have to travel to distant destinations B. car alarms being checked + "going off" because something triggers them. (We already hear some!) C. Garbage truck pick ups. People talking loudly when they return late from our RUSTIC little gem

2)

of a town. This is going to change
 our appearance to guests/visitors
 This "little town" won't be little
 anymore! So the town wants tourist
 trade — but the very thing that
 appeals to visitors is going to be
 changed when Indian Springs;
 Enchanted Cottages; Silver Lake etc
 are combined. Then, where
 will all the money from tourists
 be????

My proposal to the noise
 pollution is to reverse the
 position of the 8 units & adjoining
 9 parking spaces so that the
 units will next to the fence
 & parking will be in front
 of the units, so that less
 noise & disturbance to mobile
 home park residents.

I also propose a 10 ft. high

3) cinder block or cement or "sound" wall,
as appear next to freeways.

Sincerely yours,
Kathleen G. Sabelino
