Re: New Sign for Calistoga KITCHEN

To Whom it May Concern;

We would like to install a retro style burgundy sign with white lettering and white neon. The dimensions of the sign are 18 1/2" x 40". The sign is made of galvanized steel with UL outdoor components. We will hang the one-sided sign the Cedar Street and Lincoln corner of our property. The signs post would be on the patio side of existing fence approx 7 feet high. The present calistoga KITCHEN sign will be moved to the back, and mounted next to the back door.

The new sign design has neon tubing in the "Great Food" lettering only.

Thank you for your consideration. The sign is custom made here in the USA, and will take 3-4 weeks to complete. We are hoping for a quick approval.

Sincerely,

Rick & Ren
