*This list is not intended to be exhaustive. Some jurisdictions with foodware ordinances may not have been included. Some ordinances may have been updated after the indicated adoption date.*

# CALISTOGA REUSABLE FOODWARE & WASTE REDUCTION

~

## SUMMARY

*The goal of this waste reduction effort is to reduce the significant impact of plastic and other food packaging pollution on climate change, endangered wildlife, landfill waste, and litter, as our community strives to play a part in healing our environment.*

### **Dining-in**

- Foodware served in or at restaurants must be reusable, meaning these service items can be washed, sanitized, and used again.

### **Take-out and Leftover Foodware**

- Disposable foodware and foodware accessories offered for takeout or leftovers must be made of natural fiber, compostable materials.
- Where suitable compostable cups are not available from suppliers, plastic cups offered must have a recyclable rating of #1 or #2.
- Disposable take-out foodware accessories (napkins, utensils, straws, condiments, etc.) may be provided upon request only.
- Polystyrene foodware is not allowed.

### **Cups**

- Customers are encouraged to bring their own reusable coffee cups.
- Merchants may offer a discount for customer-provided cups.

### **Other Key Points**

- No one may use, sell or distribute polystyrene on city property or at city sponsored events.
- The city shall provide and encourage merchants to provide water bottle filling stations for public use.
- Vendors who provide solid waste containers for customer use must provide separate receptacles for solid waste (garbage), recyclables, and organics (compostables). To the extent possible these receptacles are to be placed adjacent to one another.
