Basis of Allocation of Assessments

The total maintenance costs per year were estimated and incidental administrative expenses added to yield a total annual cost. Adjustments were then made to give credit, if any, for the surplus from the previous year and to provide a cash reserve for payments to be made between July 1 and December 31, 2009. The resulting net "Costs to be assessed" were then prorated equally to the 15 lots, so that each lot will share equally in the annual landscape maintenance expenses.
